PROFESSIONAL EXPERIENCE

Software Developer

WIPRO TECHNOLOGIES LTD.

2019 - till date

Testing, Developing, and deploying Xamarin Mobile Application as a Full Stack Mobile application developer. Developed and Tested a scalable Middleware which can be deployed as a serverless application or a container for routing, and transaction of messages from the client application to gateway servers, preventing data loss, reduced resource usage, cost, and increase in the number of users handled by a server for our clients

Freelancer

SELF

2017-2019

Development, Deployment, and managing multiple projects for local firms using AWS, Cloudflare, Linux, HTML5, PHP, and WordPress for them to scale their services to reach around the globe.

EDUCATION

Bachelors in Technology

DR. APJ ABDUL KALAM TECHNICAL UNIVERSITY

2015-2019

Senior Secondary Schooling

ST. MARY'S CONVENT SCHOOL

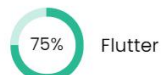

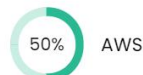

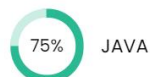

2013-2015

Secondary Schooling

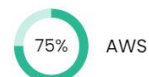

BETHANY CONVENT SCHOOL

2013

SKILLS

COMPLEMENTRY SKILLS

PROJECTS

- ✓ A Large Scale High-Performance Middleware which is to be deployed around the globe for multiple regions over Azure as a Serverless instance or a container to exchange messages from 1-10 lakh clients at the same time using Open Source Components, and building a Mobile Client application for the same using Spring Boot, WebSockets, Xamarin and Red Hat AMQ Messaging Servers.

- ✓ A Portfolio Application with a common code base for deployment around multiple platforms like macOS, Linux, Windows, Web, Android and iOS.

ACHIEVMENTS

- ✓ Endorsed by my Client and Managers for Developing and testing High-Performance Scalable Middleware SDK for message transactions from gateway servers to the mobile application. Which prevented Data Loss, Overloaded servers, and Bottleneck issues.
- ✓ A #HackWithInfi Qualifier
